

The Cold Air Balloon 2.....

By: Tae Bond

Jacket Flower had become rich, very, very rich. He could have anything he wanted in the world.

Larry found out that his pool couldn't fit on his land so Jacket purchased the neighbors land so that he could get the pool bigger than his house.

"I got a new job!" said Larry, very excited. "What is it?" said Jacket. "I now work at a factory now and! I'm payed 5 more dollars a month more than my old job at Burger King." "Whats the name of the factory?" "LM. It stands for Lame Factory, because there is only one thing made here!" "Whats that thing." "Lifts! I make lifts!" "Nice! I make thousands a day." "You don't have to rub it in." says Larry, remembering living in a tent for a day or two in Jacket's back-yard. "Well," says Jacket, wanting to spend more time with his friend, "I have to go sort out some matters of making a new Cold Air Balloon factory." "Okay, bye!" "Bye!" said Jacket, walking into his house.

What Larry didn't know is that the LM factory will be the new Cold Air Balloon factory, and that Jacket would give him a raise.

The next day, Larry went to work, his boss was handing out paychecks to all of his coworkers. When it was his turn Larry asked, "Whats going on here!?! Why are paychecks being handed out on Thursday instead of Friday!?" "Because we're closing down tomorrow." "Why?" "Because somebody had the money to purchase this factory. I'm not allowed to tell anyone what he plans to turn it into but, he will hire you if you want to work here and give you a raise." So Larry went to Jacket's house to announce his job loss.

"Jacket! I lost my job!" "Ya. I bought the factory. It didn't cost that much..." "You bought my workplace! Oh, your making a Cold Air Balloon factory. Can I work there!" "Sure! Just wait a couple of weeks so that I can get the factory fixed up and running. I plan to try some new stuff.

It's called 3DPALL. I prints anything! Metal, plastic, wood and more!

That's why it 3DPAll stands for 3D Print All. Its also powered by AI!"

"Okay... Well I look forward to making Cold Air Balloons at your factory!"

Said Larry, trying to sound happy for his friend. "You know," said Larry,

"It would be nice if I didn't have to work. Can I have some money." "You

could have 5000 dollars," Jacket said, while emptying his pocket into

Larry hands. "THANK YOU!!!!!" "Okay, bye!" "Bye!" Larry said while running to his house with quite a plan.

Jacket was hearing all kinds of noise for weeks and weeks. One day Jacket went on his computer and saw an ad that said, "Want to get wet? Go to Larry's pool place! Where you can get wet with the Fam.

Buy Now!!!!!!

Jacket was stunned that Larry had started a business with that 5000 dollars. "I'm going to his pool!"

When Jacket arrived he was stunned to find a long line and a guard. "I'm calling Larry!" Said Jacket. As Jacket typed in the numbers the guard ran over and told him to move away from the line.

"This is Larry how can I help you?" "Let me in!" said Jacket. "Sorry, I'm all full of requests right now. Do you want to schedule a date?" "No, I want to see you Larry." "Whats your name?" "Jacket Flower." "Jacket! Why Are you here!?! "I want to see your pool!"

"Why do you want to see MY, pool?"

"Because I just wanted too. That's why!" "Okay. You can see it at 2:00 AM tomorrow!" "I will never see your pool in that case because I start working at 4:00 PM today so I will never see your pool." Said Jacket, trying to see Larry's pool. "Fine! I'll let you in for seven minutes but that's all!"

As Jacket walked in he saw that the pool had problems! There was no water filter, the pool was to long-edged, and it was over packed!

"Larry. I will pay you one-thousand-nine-hundred and one if you let me fix your pool!" "But it isn't broken!" "No! Its disgusting and unsafe!" "And why is it unsafe and dirty!?! "Because its has no filter and the edge is hard and its over-packed!" "Now that I have a business you want to hunt me! Leave Now!" Said Larry. "Okay bye," Jacket said while walking away.

"Larry has never been this mad at me! I wonder whats going on...."

As Jacket walked home he got a text from the factory saying: "Hey Jacket. 3DPall is meant to be a building AI that can build anything. It decided that 'in its spare time' it would make a drug that makes people do anything they want just as a 'project' to 'correct the world'. So it built a drug factory inside the balloon factory and asked one of the workers to test the drug. He chose Larry because of his dumb but strong

mind. After he drugged him he ran around the building asking people for money in ways that make them want to! He got a total of a ten-thousand dollars out of this factory! Just wanted to say that he wants to drug me now that I told you all this so bye!"

"I need to shut it down!" Said Jacket, now running home to remove 3DPALL from his home server.

As he got home he ran to the room with the server in it 3DPALL was meant to be in the home server and the one at the factory so he got on one of his computers. He made sure that there was no sign that it was his trying to shut 3DPALL.

As Jacket plugged into the sever and found out that 3DPALL re-coded itself. Now the home server is just a backup for him now.

"I'll just smash the server. Its not my worst idea!"

As Jacket smashed the server but in the factory the wood cutter fell of 3DPALL's printing system.

Two minutes later he got a text from Pat saying: "Hi Jacket! 3DPALL's wood printing system somehow fell off. He says one of his servers were taken out and that his wood system was on there. That's all I have to say. Bye."

"I could have used this server to make him break himself but I just destroyed the server. That's sad."

"I don't know how to code 3DPALL." Said Jacket panicking so he quickly got online and looked up 'how to ruin 3DPALL' and it said, 'sorry, no results. Be more descriptive.' Than he tried, 'how to blow up 3DPALL and his servers and systems'. The search said "Sorry, no results. You know,

maybe you could try something LESS descriptive." Jacket did not think that was funny.

So then he looked up something less complicated: "3DPALL user Mauel."

In response the search said something different: 'Are you DUMB. LEARN HOW TO SPELL. Here's the link to SPELLING CLASS.'

Jacket then switched to google to avoid AI search.
